State-of-the-art-facilities

Kilsaran's manufacturing plant in Dunboyne, County Meath is one of the most modern of its kind anywhere in the world. But we're not resting on our laurels. We have a purpose-built high-tech lab for quality testing and assurance.

Quality is paramount to us. We are so confident of the quality of our products that we provide a 25 year guarantee on your purchases, subject to normal usage.

QUALITY SYSTEMS AND CERTIFICATION

INAB ISO 17025 (UKAS equivalent). A separate R&D facility ensures continuing expansion of our product range. "Ideas taking shape" isn't just our motto – it's our passion.

We are also committed to innovation in sustainability issues and now offer a range of eco-products.

Sustainable development plays a central role in all that we do.

We are fully committed to compliance with all relevant legislation, prevention of pollution and continuous improvement in all areas of environmental management in all of our operations and activities.

We have implemented Environment and Planning Management Systems (EMS) into our day-to-day operations and employ professionals in Environment and Planning to help us lead the way in environmental management.

Our goal is to minimise the environmental impact of our business and, where possible, provide environmental benefits to all our stakeholders by recycling, reusing and creating new innovative systems, products and sales routes.

We are committed to working towards the management guidelines as set out in accordance with ISO 9001, ISO 14001 and ISO 50001 to provide the best working environment for our employees and local communities. We aim to fulfill these requirements while still continuing to meet the requirements of our stakeholders.

Part of the
ECO Paving Range

Eco Product Range

‘Major investment in our manufacturing facilities has allowed Kilsaran to develop one of the leading manufacturing plants in Europe and supports our policy on sustainability.’

This means we are now able to offer a range of eco-products that will benefit the whole industry.

All products in our Eco Paving ranges contain 100% recycled water, locally sourced materials, a minimum of 25% non-primary aggregates, up to 10% pre-consumer aggregate replacement and 50% cement replaced with a carbon neutral cement replacement. We have one of the largest ranges of Eco products within the industry.

CARBON FOOTPRINT

When evaluating the carbon footprint of our paving products, our technical team can provide project specific information and calculated carbon footprint.

Contact our team if you require further guidance on info@kilsaran.ie

Design Clinic

With an extensive choice of textures, colours and shapes to choose from it's hardly surprising that you might find it more than a little daunting to bring the vision of your garden or patio to life. A well designed space will not only give you years of satisfaction but also add value to your home.

The good news is that we have a team of qualified, creative and inspired designers who would love to help your ideas take shape.

BESPOKE DESIGN SERVICE

Do you need more indepth design advice for your garden? If you have a larger garden or more difficult space you might benefit from an onsite visit from one of Kilsaran's expert garden designers. Over the course of a 90 minute consultation at your home, our expert designer will discuss your vision, take measurements and make suggestions. Within 10 working days of the site visit you will receive digitised two-dimensional and 3D drawings, a bill of quantities and priced quotation.

Fees apply for the service and a quotation will be provided on request.

**Come chat
with us!**

Our in-house Head Designer Mark Harewood graduated from the University of Ulster with a HND in Architectural Technology in 1992. Before joining Kilsaran in 2011 Mark worked for several large architectural practices in the UK producing traditional architectural presentation and construction drawings before specialising in 3D Architectural visualisations and graphics.

FREE DESIGN DAYS

Let the Kilsaran Team create a design for you that will transform your garden into an outdoor living space. Over the course of the year we will run a number of free landscape design days that will allow you to pre-book a 30 minute design slot with one of our garden designers who will advise you on layout, planting, materials and installation of your new garden.

For more details and a full list of dates for these design days check www.kilsaran.ie/free-design-days

Community & Social Responsibility

In 2015 Our Dry Products Business & Product Development Manager, Ken Mulkerrins, was diagnosed with having end stage heart failure, he was admitted to hospital where he was told his only option for treatment was a heart transplant. This was an extremely difficult time for Ken, his wife and two young children, who got to see their daddy for about 1 hour a week. He was called seven times about a potential donor heart – and finally, on the eight occasion there was a match and Ken underwent surgery in the Mater Hospital.

Recovering from heart surgery is a slow process which Ken dealt with by focusing on one goal at a time. First up was to get back walking, then returning to work in Kilsaran. After returning to work Ken took up running, and soon turned his attention to adventure racing following encouragement from his work colleagues. It was at this time that Ken saw his opportunity to raise some funds for the Irish Heart & Lung Transplant Association. Ken entered the Quest Glendalough adventure race and started a charity funding page. Ken and a number of his Kilsaran colleagues took part in the race, and Ken raised over €1600 for the charity which Kilsaran matched meaning a total of over €3200 raised!

“Having experienced what I have, I would encourage everyone to consider organ donation and #havethechat with your loved ones to let them know your wishes. I’d also say, challenge yourself, you’ll be surprised what you’re capable of.”

Ken went on to complete Quest Achill and Killarney as well as numerous other adventure races around the country. Ken commented that “An added benefit to taking part in these events, was that it gave me a chance to raise awareness of organ donation and how important it is to ‘have the chat’. We raised more than €3200 for the Irish Heart and Lung Transplant Association. I can’t explain what a difference has been made to my life by this charity and the staff of the Mater Hospital. Having experienced what I have I would encourage everyone to consider organ donation and #havethechat with your loved ones to let them know your wishes. I’d also say, challenge yourself, you’ll be surprised what you’re capable of.”

Kilsaran at Bloom & Super Garden

Darren Joyce wins RTE's Super Garden with his Lock Keepers View Garden.

Landscape Designer Darren Joyce won Super Garden 2018 with his Lock Keeper's View Garden for the Nassiris in Stepside. The garden which took nearly four months to create features a vast array of Kilsaran paving and walling products. The garden has a Mediterranean feel with a French lock-keepers gate design that is striking, ambitious and immediately grabbed the judges attention.

The pathways and patio areas were created using Cambridge Ivory flag paving with Tara Kerbing and Decorative Stone. Our Connemara Walling was used to create raised beds for planting and the wing walls for the lock gate focal point. Our Oakstone in weathered grey defined the canal area in the garden

Darren succeeded in creating a spectacular garden that has a wow factor in the lock gate but also has a calm and relaxing feel to it as per his clients brief. The garden was very well received at Bloom in the Phoenix Park and fulfilled a lifelong dream of Darren's to be an award winning garden designer.

PAVING FLAGS

SHELBOURNE FLAGS | NEWGRANGE FLAGS | BELVEDERE FLAGS
PEMBROKE FLAGS | CASHEL FLAGS | OAKSTONE | STEPSTONE
CLASSIC FLAGS | TACTILE FLAGS

Shelbourne Flags

Tactile Flags

Tactile Paving is used to assist and guide the visually impaired in various situations including pedestrian crossings and around hazards and obstructions.

1. Blister Profile Tactile Paving

Provides a warning to visually impaired people who would otherwise, in the absence of a kerb upstand <25mm high, find it difficult to differentiate where the footway ends and the carriageway begins. The most extensively used tactile at almost all pedestrian crossings in urban and residential situations.

2. Corduroy Hazard Warning Tactile Paving

Provides a warning to visually impaired people of the presence of specific hazards, eg steps, level crossings or the approach to on street light rapid transit platforms. The most common use for the Corduroy Hazard Warning unit is at the top and bottom of steps. Usually Laid in buff yellow colour.

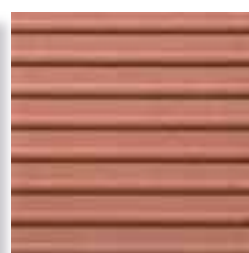

Buff (Blister)

Accessories

Gravel Stabiliser

Nidagravel gravel stabiliser ensures driving, walking, cycling and wheeling a bicycle, wheelchair, pushchair or pram across gravel are no longer a problem.

The gravel is laid in honeycombs which keep it in place and prevent it from moving or migrating. Ugly ruts, puddles and potholes are a thing of the past.

Available in
ROI only

PRODUCT RANGE	Dimensions (mm)
Gravel Stabiliser	1200 x 800 x 30mm
Recessed Manhole Covers	300 x 300 and 600 x 600

Recessed Manhole Cover

Recess manhole covers will add an aesthetically pleasing appearance to your new driveway or patio.

Available in
ROI only

DECORATIVE STONE

Decorative stone is perfect when creating informal garden paths, separating landscaped areas or simply adding colour. There's no need to 'square off' patios when you can use decorative stone to create a relaxed and informal feel to the space. Available in small or standard bulk bags.

**Range correct

INSTALLATION & PRODUCT CARE

LAYING FLAG PAVING | LAYING BLOCK PAVING | SAND, SEALERS & PRODUCT CARE

DISCLAIMERS | TECHNICAL DATA | KILSARAN SHOWROOMS & GARDEN | KILSARAN LOCATIONS

LAYING FLAG PAVING

A sand/cement bedding mix is used as the laying course and this is screeded off to the correct levels. We recommend the use of our pre-mixed Patio Bedding Mix (in 25kg bags) for domestic patio areas.

Using a spirit level and a pavior maul, ensure that the flags are laid evenly.

The jointing material (Kilsaran Jointing Sand) is carefully swept into the joints.

Sealing and regular maintenance will keep your new paving flags looking great.

LAYING BLOCK PAVING

The laying course is normally a natural clean sharp gritty sand, laid moist in a 30–50mm layer and screeded off to correct levels. Alternatively, a clean grit may be used.

The jointing material (Kilsaran Jointing Sand) is carefully swept into the joints.

An appropriate plate compactor is used to compact the paving blocks fully. Any joints not full after compaction is complete are topped up by sweeping more sand into them.

Sealing and regular maintenance will keep your new paving blocks looking great.

CHECKLIST:

- Check how long the company has been laying paving products.
- Ask for some recent references of work undertaken. A reputable contractor will be delighted to show off recent work. Don't be too embarrassed to make a phone call or call in person to a previous customer – either way, you won't regret it.
- Ask for a written quotation before work commences and make sure you go through it in detail. Ask questions such as if skip hire and jointing sand is included?
- Check if the contractor has the appropriate liability insurance.
- A reputable contractor will expect their work to be of the highest standard and to last accordingly. They should have no problem guaranteeing it – so ask them to.
- While Kilsaran make every effort to ensure we only recommend the best paving and walling contractors, Kilsaran will not guarantee the workmanship of any paving contractor or offer any warranty against their work, nor will we accept any liability for any loss or damage suffered as a result of engaging recommended contractors.

Please Note!

Please be advised that flags should be lifted straight off the piece beneath as they are liable to scratches when dragged along the surface. Some of our larger sized flags can weigh up to 40kg/piece and we would recommend lifting them from the pallet with two people rather than one to ensure there is minimum surface scratching.

SANDS & SEALERS

Pre-Mixed Products

Our range of easy-to-use pre-mixed products come in handy bags and are ideal for home use;

- **Patio Bedding Mix, for laying paving flags**
- **Sand & Cement Mix, for general purpose use**
- **Post 10, for fixing all types of posts**
- **Rapid-Setting Concrete, for haunching kerbs**

Our range of Jointing Sands are also available in handy bags and can coordinate with our entire range.

Kilsaran pre-mixed products in handy bags

Sealer

We recommend that you protect your investment with our enviro-friendly sealer.

Our sealer offers all-round protection. It is a water-based impregnating treatment for concrete paving units. Without changing the colour or texture of the surface, it provides a liquid and oil resistant surface. Ideal for use on driveways, patios and paths as it protects surfaces from weathering and helps keep them cleaner by resisting penetration of:

- **Water**
- **Air-borne dirt**
- **Food stains**
- **Drinks**
- **General dirt**
- **Oil and grease stains**
- **Chewing gum**
- **Organic growth (moss & lichens)**

In addition to limiting the appearance of efflorescence, sealer also reduces spalling through repeated freeze/thaw cycles. A properly sealed surface will make maintenance of the area much easier with reduced need for weed killers and power washing equipment. Requirement for cleaning is significantly reduced, leaving you to enjoy your home and garden!

PRODUCT CARE

General Dirt & Colour Masking

General dirt can be removed and kept away by regular brushing. When dirt has become somewhat ingrained onto the surface of the paving or if the paving has become dull or discoloured, then scrubbing with soap and warm water will usually restore the surface. However some dulling of colour and ageing of the product is to be expected over time. Please be careful when choosing your colour pallet for a driveway as some colours may be subject to staining from vehicular traffic.

When a power-hose is used for cleaning paved surfaces it is important to note that this is likely to remove some of the jointing material which will need to be replaced. Excessive power-washing can also damage the surface of the paving.

Moss, Lichens and Algae Growth

The growth of moss, lichens or algae usually only occurs on paved areas which are not regularly trafficked by vehicles/ pedestrians, and where there is shading or insufficiently drained paving. Where growths of this kind are encountered there are several commercially available patio and paving cleaners that can be found in local DIY Stores and Garden Centres.

The patio and paving cleaner should be used strictly as per the manufacturer's instructions and carefully applied as directed. Many of these cleaning agents are designed to inhibit the re-growth of moss, lichen, algae and weeds. In situations where re-growth is likely, more frequent use of such cleaning agents may be required.

Please note: Pets and children should be kept clear from areas treated with chemical based cleaners as they may contain harmful ingredients. Always follow the manufacturer's instructions.

Disclaimer: This information serves as a guideline only. Kilsaran does not accept responsibility for damage or colour leaching/fading caused by the use of third party cleaning or detergent chemicals when used on our paving products.

As concrete paving is made from naturally occurring aggregates some slight and normal colour variation may occur. Efflorescence may occur as a naturally occurring phenomenon when temporary white stains may appear on the paving surface. Kilsaran cannot accept responsibility for these natural occurrences.

DISCLAIMERS/IMPORTANT INFORMATION

This Brochure

This brochure was printed in January 2019 and the information within it supersedes all previous brochures. We have taken every reasonable precaution to ensure that all details contained in the brochure are accurate. We are an innovative company and we seek to develop our product ranges and product lines on an ongoing basis. We recommend that you check online or by calling us to ensure that you have the most up-to-date product information to hand.

Our promise and guarantee

We promise, that with normal usage, our products will last for at least 25 years from the date of purchase. Our Product Promise is personal to the end-user and as such is non-transferable. It is limited to the product and does not cover installation defects or consequential losses. Whilst the Product Promise confers no rights other than those expressly stated, your statutory rights as a consumer are not affected.

Our Paving Products

When our product is delivered and before it is laid, the customer should satisfy themselves that the product is free from defects or damage. Any product failing to meet the product specification will be replaced as per our product promise. Our product promise relates strictly to the product only. Kilsaran cannot accept liability for replacement installation costs and/or delays incurred as a result of product that is defective or damaged which is laid. Any defects must be notified to Kilsaran immediately and any breakages must be reported within 72 hours of delivery.

Scuff and Scratches

Small scuffs or scratches on the surface of our paving products may arise during transportation, handling of the product on site or compaction. Please be advised that flags should be lifted straight off the piece beneath as they are liable to scratches when dragged along the surface. These scratches are quite normal and will disappear over time. They do not affect the integrity of the product in any way.

Efflorescence

Efflorescence is a naturally occurring phenomenon when temporary white stains may appear on the paving product surface. This is inherent in concrete products, this is not a product defect. Over time, these stains are gradually washed away by rain and weathering. Kilsaran cannot accept responsibility for these natural occurrences.

Colour Illustrations

Through the use of the most modern photographic techniques available we endeavour to ensure that the colour illustrations of our paving products in this brochure are as accurate as possible. We do recommend that any final decision is based upon viewing a sample of the product. These samples can be provided by paving centres stocking our product, your laying contractor or at our Display Showrooms in Dunboyne, County Meath.

Colours and Blending

Kilsaran uses high-quality photo stable iron oxide pigments to create the various colours in the paving products range. As with all concrete products, our paving products may be subject to slight colour variation due to the natural variation in raw materials used and from weathering over time. These are natural occurrences inherent in all concrete products, Kilsaran cannot accept responsibility for these natural occurrences.

When laying, in order to achieve an even blend of colour, it is essential to work equally from a minimum of three packs, laying evenly from each. It is essential to measure the area to be paved accurately allowing for waste. The full quantity of required product should be advised to Kilsaran so that we may deliver as one batch. Additional material subsequently ordered may delay the completion of your project and may be from a separate production batch and there may be a shading difference.

Structural Integrity

Some of our paving products have been deemed suitable for driveways, this refers to the structural integrity of the product to withstand the weight of vehicular traffic. Please be careful when choosing your colour pallet for a driveway as some colours may be subject to staining from vehicular traffic and Kilsaran are in no way responsible for this should it occur.

Returned Products

Kilsaran does not accept returns on any materials.

Commitment to Customer Satisfaction

We strive to provide the best products in the market backed up by superior customer service. If our products or service do not meet your expectations please contact us.

Special Orders

The colour swatches displayed in this brochure best reflect our most popular colours within specific product ranges at the time of going to print. It may be possible to produce these products in other colours not displayed on the relevant swatch depending on the order volume. Kilsaran reserves the right to refuse to manufacture products in specific colours. Special colours may be subject to greater lead time than standard stock colours.

FOR ALL OUR LATEST NEWS & OFFERS LOG ON TO
kilsaran.ie or kilsaraninternational.co.uk

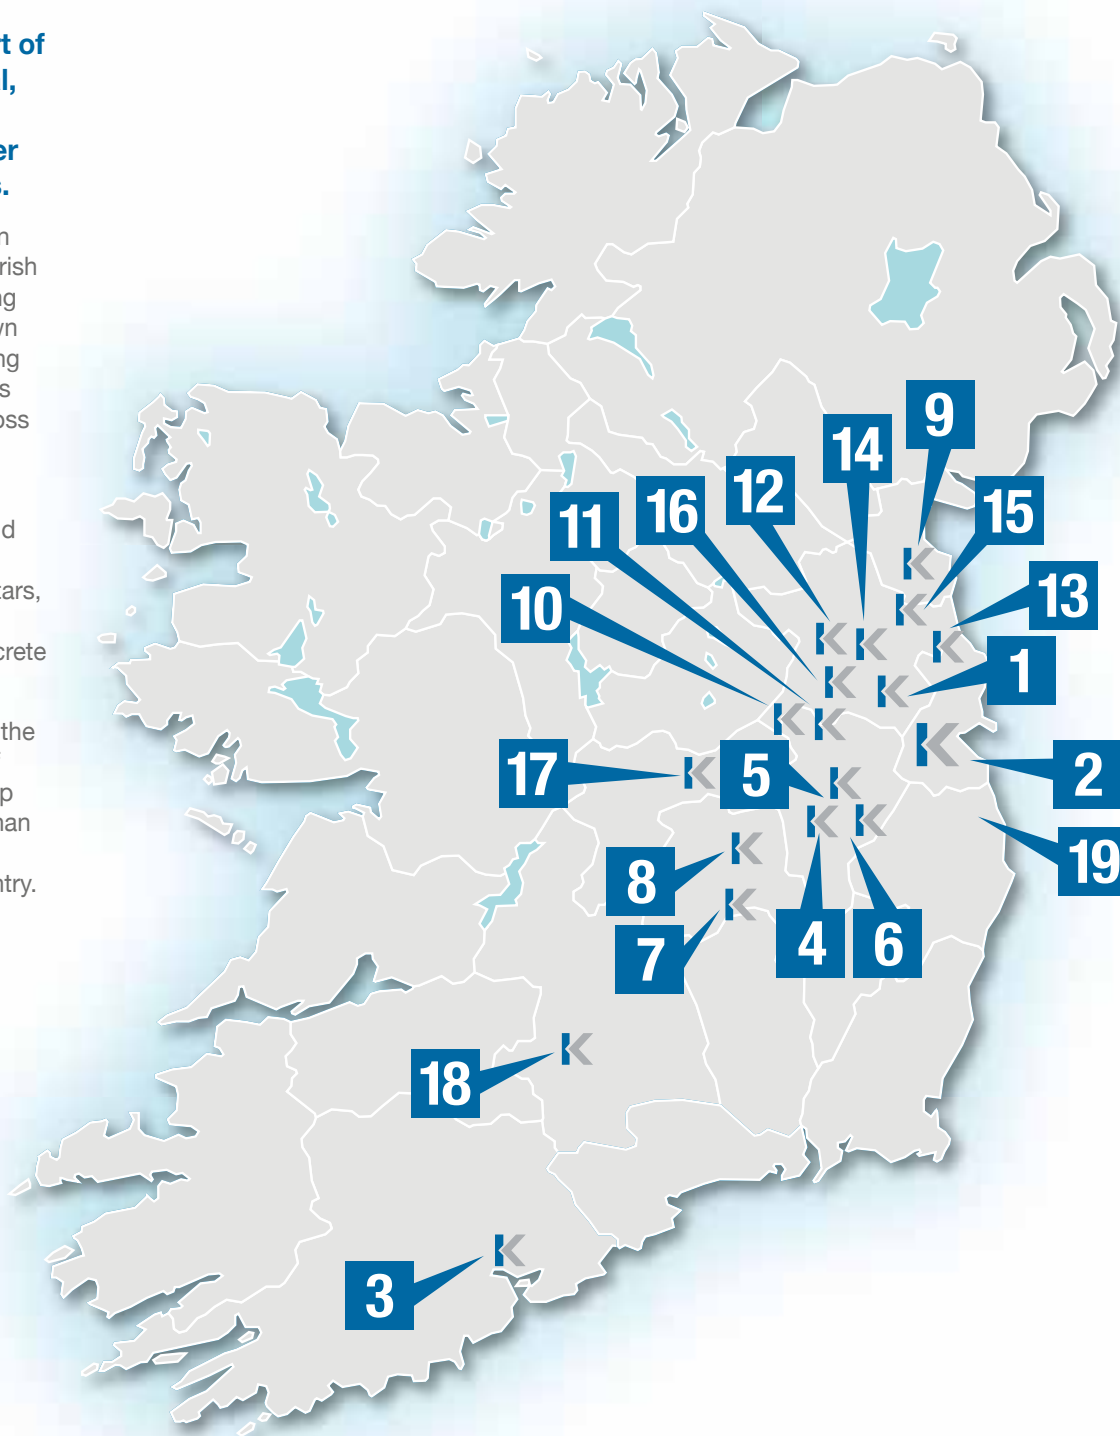

Kilsaran Home is part of Kilsaran International, Ireland's leading independent producer of concrete products.

This family-owned and run business is quite literally Irish from the ground up, mining raw materials from our own quarries and manufacturing end products at its various manufacturing plants across the country.

We specialize in making superior quality paving and walling, road surfacing materials, pre-mixed mortars, renders, screeds and, of course, ready-mixed concrete and blocks.

Proud to be a member of the Guaranteed Irish family of brands, the Kilsaran Group currently employs more than 500 people at numerous locations around the country.
