Kilsaran
home

our story

As one of the largest paving manufacturers in Ireland and the UK, Kilsaran Home has been trusted by garden designers, landscapers and homeowners for generations. Kilsaran offer an exceptional range of walling, patio and driveway products to help bring your dream outdoor space to life.

With a reputation for innovation, Kilsaran continues to break new ground in terms of manufacturing best practice and has invested heavily in state-of-the-art manufacturing systems to pass the very best product on to our customers.

At Kilsaran we believe that even the smallest of outdoor spaces can be turned into a stylish outdoor oasis. Our paving flags, blocks and walling products come in an array of colours and textures, paying the perfect complement to your next project.

From sun kissed seasonal tones to contemporary blacks and greys, the Kilsaran range has evolved to keep up with the latest trends and styles. With such a vast array of product choice on offer - it is safe to say Kilsaran has your next project covered.

Guaranteed Irish
Proud to be a member of the Guaranteed Irish Family of Brands.

playing our part

At Kilsaran, we believe that the type of company we are filters down into every area of our business. While customers primary concern is naturally the quality of the products and reliability of the service, we take seriously our commitment to Corporate Social Responsibility.

We endeavour to be industry leaders in every aspect of our business. Our customers and their communities have built our business over the years and we feel it's only fair to give something back.

One such example of this is our work with The Field of Dreams - an inspirational training facility for adults living with Down Syndrome. In this unique 3-acre site, focus is on personal growth and skills acquisition, with the attainment of paid, part-time work for people with Down Syndrome the driving ambition.

Kilsaran were on hand to support the great work being done and happily supplied the paving product that formed the central courtyard and main pathway into the site. It is the small things we do that can bring about big changes.

garden design days

With an extensive choice of textures, colours and shapes to choose from it's hardly surprising that you might find it more than a little daunting to bring the vision of your garden or patio to life. A well designed space will not only give you years of satisfaction but also add value to your home.

The good news is that we have a team of qualified, creative and inspired designers who would love to help your ideas take shape.

Our dedicated team will create a design for you that will transform your garden into a beautiful outdoor living space. Over the course of the year we will run a number of landscape design days at Kilsaran Home in Dunboyne, Co. Meath, where you can pre-book a dedicated consultation with one of our professional garden designers, who will advise you on layout, planting, materials and installation of your new garden.

For more details and a full list of dates for these design days visit our website at www.kilsaran.ie/garden-design-days and watch out for regular updates on our social channels.

super garden 2019

Super Garden in association with Kilsaran Home, once again dazzled audiences with innovative creations of five budding gardeners. But when it comes to being "best in show", there was no competition. Gráinne Walsh's dog-friendly garden wowed audiences in the penultimate episode of Super Garden and was named the winning garden at Bloom 2019.

Conceived and built in just four weeks, Gráinne's "Under Dogs Garden" was designed to be a canine paradise, which would also suit homeowner Aileen and her two rescue dogs Mossy and Dexter.

Gráinne was crowned as the Silver Medal winner by Super Garden judges and had the pleasure of recreating her stunning garden at Bloom in Dublin's Phoenix Park. The finished space was as beautiful as it was functional, featuring dog-friendly style points that enhance without dominating the landscape of the garden - a worthy winner of Super Garden 2019.

merrion flags

Merrion's clean edges and smooth texture mirror the latest design trends, helping customers achieve the desired contemporary look to their outdoor space. All flags are 40mm in depth for greater ease of application, offering a modern alternative to porcelain and natural stone.

installation & product care

PLEASE NOTE!

Please be advised that flags should be lifted straight off the piece beneath as they are liable to scratches when dragged along the surface. Some of our larger sized flags can weigh up to 40kg/piece and we would recommend lifting them from the pallet with two people rather than one to ensure there is minimum surface scratching.

LAYING FLAG PAVING

A sand/cement bedding mix is used as the laying course and this is screeded off to the correct levels. We recommend the use of our pre-mixed Patio Bedding Mix (in 25kg bags) for domestic patio areas.

Using a spirit level and a pavior maul, ensure that the flags are laid evenly.

The jointing material (Kilsaran Jointing Sand) is carefully swept into the joints.

Sealing and regular maintenance will keep your new paving flags looking great.

LAYING BLOCK PAVING

The laying course is normally a natural clean sharp gritty sand, laid moist in a 30–50mm layer and screeded off to correct levels. Alternatively, a clean grit may be used.

The jointing material (Kilsaran Jointing Sand) is carefully swept into the joints.

An appropriate plate compactor is used to compact the paving blocks fully. Any joints not full after compaction is complete are topped up by sweeping more sand into them.

Sealing and regular maintenance will keep your new paving blocks looking great.

CHECKLIST

- Check how long the company has been laying paving products.
- Ask for some recent references of work undertaken. A reputable contractor will be delighted to show off recent work. Don't be too embarrassed to make a phone call or call in person to a previous customer – either way, you won't regret it.
- Ask for a written quotation before work commences and make sure you go through it in detail. Ask questions such as if skip hire and jointing sand is included?
- Check if the contractor has the appropriate liability insurance.
- A reputable contractor will expect their work to be of the highest standard and to last accordingly. They should have no problem guaranteeing it – so ask them to.
- While Kilsaran make every effort to ensure we only recommend the best paving and walling contractors, Kilsaran will not guarantee the workmanship of any paving contractor or offer any warranty against their work, nor will we accept any liability for any loss or damage suffered as a result of engaging recommended contractors.

sands & sealers

PRE-MIXED PRODUCTS

Our range of easy-to-use pre-mixed products come in handy bags and are ideal for home use;

- Patio Bedding Mix, for laying paving flags
- Post 10, for fixing all types of posts
- Rapid-Setting Concrete, for haunching kerbs
- Sand & Cement Mix, for general purpose use

In addition to limiting the appearance of efflorescence, sealer also reduces spalling through repeated freeze/thaw cycles. A properly sealed surface will make maintenance of the area much easier with reduced need for weed killers and power washing equipment. Requirement for cleaning is significantly reduced, leaving you to enjoy your home and garden!

Kilsaran Seal

We recommend that you protect your investment with our enviro-friendly sealer – Kilsaran Seal. Kilsaran Seal offers all-round protection, it is a water-based impregnating treatment for concrete paving units. Without changing the colour or texture of the surface, it provides a liquid and oil resistant surface. Ideal for use on driveways, patios and paths as it protects surfaces from weathering and helps keep them cleaner by resisting penetration of:

- Water
- Air-borne dirt
- Food stains
- Drinks
- General dirt
- Oil and grease stains
- Chewing gum
- Organic growth (moss & lichens)

Reducing Maintenance Costs

Kilsaran Seal creates a protective layer on the paving surface repelling everyday household stains such as spills, mud and grime from adhering to the surface of the paving.

One of the major benefits of using Kilsaran Seal is the significant reduction in maintenance time and associated costs, up to 80% in some cases.

Kilsaran
SEAL

product care

GENERAL DIRT & COLOUR MASKING

General dirt can be removed and kept away by regular brushing. When dirt has become somewhat ingrained onto the surface of the paving or if the paving has become dull or discoloured, then scrubbing with soap and warm water will usually restore the surface. However some dulling of colour and ageing of the product is to be expected over time. Please be careful when choosing your colour pallet for a driveway as some colours may be subject to staining from vehicular traffic.

When a power-hose is used for cleaning paved surfaces it is important to note that this is likely to remove some of the jointing material which will need to be replaced. Excessive power-washing can also damage the surface of the paving.

MOSS, LICHENS AND ALGAE GROWTH

The growth of moss, lichens or algae usually only occurs on paved areas which are not regularly trafficked by vehicles/ pedestrians, and where there is shading or insufficiently drained paving. Where growths of this kind are encountered there are several commercially available patio and paving cleaners that can be found in local DIY Stores and Garden Centres.

The patio and paving cleaner should be used strictly as per the manufacturer's instructions and carefully applied as directed. Many of these cleaning agents are designed to inhibit the re-growth of moss, lichen, algae and weeds. In situations where re-growth is likely, more frequent use of such cleaning agents may be required.

Please note: Pets and children should be kept clear from areas treated with chemical based cleaners as they may contain harmful ingredients. Always follow the manufacturer's instructions.

Disclaimer: This information serves as a guideline only. Kilsaran does not accept responsibility for damage or colour leaching/fading caused by the use of third party cleaning or detergent chemicals when used on our paving products.

As concrete paving is made from naturally occurring aggregates some slight and normal colour variation may occur. Efflorescence may occur as a naturally occurring phenomenon when temporary white stains may appear on the paving surface. Kilsaran cannot accept responsibility for these natural occurrences.

disclaimers/important information

This Brochure

This brochure was printed in January 2020 and the information within it supersedes all previous brochures. We have taken every reasonable precaution to ensure that all details contained in the brochure are accurate. We are an innovative company and we seek to develop our product ranges and product lines on an ongoing basis. We recommend that you check online or by calling us to ensure that you have the most up-to-date product information to hand.

Our Promise and Guarantee

We promise, that with normal usage, our products will last for at least 25 years from the date of purchase. Our Product Promise is personal to the end-user and as such is non-transferable. It is limited to the product and does not cover installation defects or consequential losses. Whilst the Product Promise confers no rights other than those expressly stated, your statutory rights as a consumer are not affected.

Our Paving Products

When our product is delivered and before it is laid, the customer should satisfy themselves that the product is free from defects or damage. Any product failing to meet the product specification will be replaced as per our product promise. Our product promise relates strictly to the product only. Kilsaran cannot accept liability for replacement installation costs and/or delays incurred as a result of product that is defective or damaged which is laid. Any defects must be notified to Kilsaran immediately and any breakages must be reported within 72 hours of delivery.

Scuff and Scratches

Small scuffs or scratches on the surface of our paving products may arise during transportation, handling of the product on site or compaction. Please be advised that flags should be lifted straight off the piece beneath as they are liable to scratches when dragged along the surface. These scratches are quite normal and will disappear over time. They do not affect the integrity of the product in any way.

Efflorescence

Efflorescence is a naturally occurring phenomenon when temporary white stains may appear on the paving product surface. This is inherent in concrete products, this is not a product defect. Over time, these stains are gradually washed away by rain and weathering. Kilsaran cannot accept responsibility for these natural occurrences.

Colour Illustrations

Through the use of the most modern photographic techniques available we endeavour to ensure that the colour illustrations of our paving products in this brochure are as accurate as possible. We do recommend that any final decision is based upon viewing a sample of the product. These samples can be provided by paving centres stocking our product, your laying contractor or at our Display Showrooms in Dunboyne, County Meath.

Colours and Blending

Kilsaran uses high-quality photo stable iron oxide pigments to create the various colours in the paving products range. As with all concrete products, our paving products may be subject to slight colour variation due to the natural variation in raw materials used and from weathering over time. These are natural occurrences inherent in all concrete products, Kilsaran cannot accept responsibility for these natural occurrences.

When laying, in order to achieve an even blend of colour, it is essential to work equally from a minimum of three packs, laying evenly from each. It is essential to measure the area to be paved accurately allowing for waste. The full quantity of required product should be advised to Kilsaran so that we may deliver as one batch. Additional material subsequently ordered may delay the completion of your project and may be from a separate production batch and there may be a shading difference.

disclaimers/important information

Structural Integrity

Some of our paving products have been deemed suitable for driveways, this refers to the structural integrity of the product to withstand the weight of vehicular traffic. Please be careful when choosing your colour pallet for a driveway as some colours maybe subject to staining from vehicular traffic and Kilsaran are in no way responsible for this should it occur.

Returned Products

Kilsaran does not accept returns on any materials.

Commitment to Customer Satisfaction

We strive to provide the best products in the market backed up by superior customer service. If our products or service do not meet your expectations please contact us.

Special Orders

The colour swatches displayed in this brochure best reflect our most popular colours within specific product ranges at the time of going to print. It may be possible to produce these products in other colours not displayed on the relevant swatch depending on the order volume. Kilsaran reserves the right to refuse to manufacture products in specific colours. Special colours may be subject to greater lead time than standard stock colours.
