

## Case Study

# Stillorgan Stillorgan, Dublin

**Developer:** Dun Laoghaire Rathdown

**Year of Completion:** 2024

**Region:** Leinster

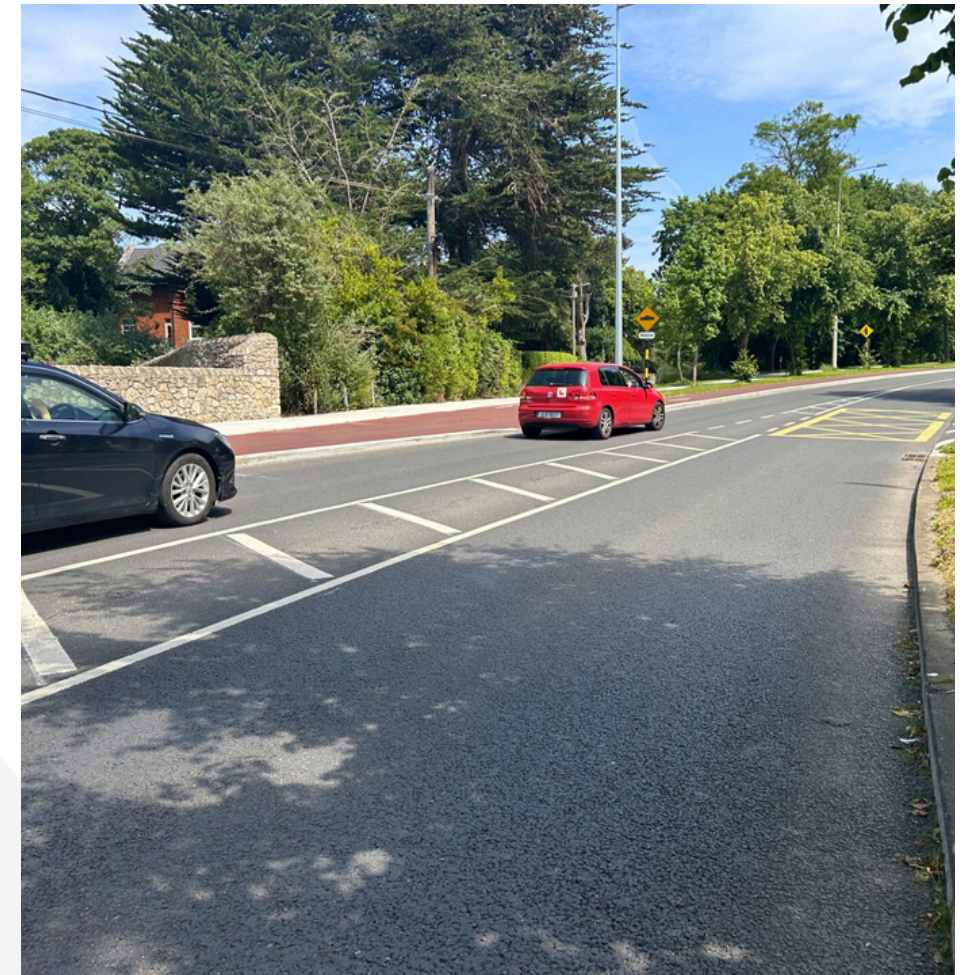

**Sector:** Public Realm

Kilsaran Road Surfacing were contracted by Murphy International to resurface an existing carriageway with Stone Mastic Asphalt and the cycle lanes with Red Asphalt, in accordance with the NTA specification.

The Active Travel scheme covered the Stillorgan Park Road, which is approx. 1000m, linking the existing cycle track on Carysfort Avenue, cycle lanes on Fleurville Road and primary cycle route on N11 Stillorgan Road.

Stone Mastic asphalt as a surface course offers superior strength, flexibility and weather resilience which is very suitable material for this project.
