

Case Study

Supervalu Hansfield Luttrell's Lane, Co.Dublin

Client/Developer: Musgrave Limited

Main Contractor: Crossdoney Construction & Design Limited

Structural Engineer: Malachi Cullen Consulting Engineers

Landscap Architect: ÁIT Urbanism & Landscape

Sector: Commercial

Region: Leinster

Year of Completion: 2026

Kilsaran was proud to supply a range of premium paving and road surfacing solutions for SuperValu Hansfield, delivering a durable, visually striking, and sustainable project.

This development incorporated our Newgrange Block Black Granite and Silver Granite, Tactile Blister Buff paving, Tara Kerb Silver Granite, and Newgrange Cobbles Silver Granite, creating a high-quality finish throughout pedestrian and vehicular areas.

Our Road Surfacing business unit supplied 60mm AC20 binder course which was installed beneath a 40mm SMA10 PMB surface course, ensuring long-term performance and durability. Sustainability was a key consideration, with Kilsaran utilising both Reclaimed Asphalt Pavement (RAP) materials and its innovative Thermaphalt Warm Mix Technology. This approach significantly reduced production temperatures and delivered a more sustainable asphalt solution, achieving up to 25% lower CO₂ emissions while maintaining exceptional quality and performance.

This completed development showcases Kilsaran's commitment to combining aesthetics, durability, and environmental responsibility in modern urban infrastructure.

Kilsaran PRODUCTS

Paving:

- Newgrange Block Black Granite: 240x160x80mm
- Newgrange Block Silver Granite: 210x160x80mm
- Tactile Blister Buff: 400x400x50mm
- Tara Kerb Silver Granite: 915x250x125mm
- Newgrange Cobbles Silver Granite: 100x100x80mm

Roadsurfacing:

- 60mm deep AC20 binder course
- 40mm SMA10 PMB surface course
