

Case Study

Murphystown Way Leopardstown, Co. Dublin

Main Contractor: Walls

Installer: GDC Construction

Sector: Residential

Region: Leinster

Year of Completion: 2026

Product Used: Cemfloor C20 Therm

Kilsaran supplied C20 Therm for Murphystown Way, Dublin 18, a large-scale residential development comprising 254 units across 23 blocks. The project required a high-performance screed solution capable of supporting efficient installation while delivering the thermal and structural performance needed across a multi-block scheme.

Installed by GDC Construction, C20 Therm provided a reliable, free-flowing flooring solution that enabled fast placement, excellent surface regularity, and consistent results throughout the development. Its performance characteristics helped streamline the construction programme while creating a durable foundation for subsequent floor finishes.

By combining the benefits of C20 Therm with the expertise of GDC Construction, Kilsaran helped deliver a high-quality flooring solution that supported the successful completion of this significant residential development in Dublin 18.
