

Case Study

Pipers Hill Naas, Co.Kildare

Client : Micheal Doyle Civil Engineering

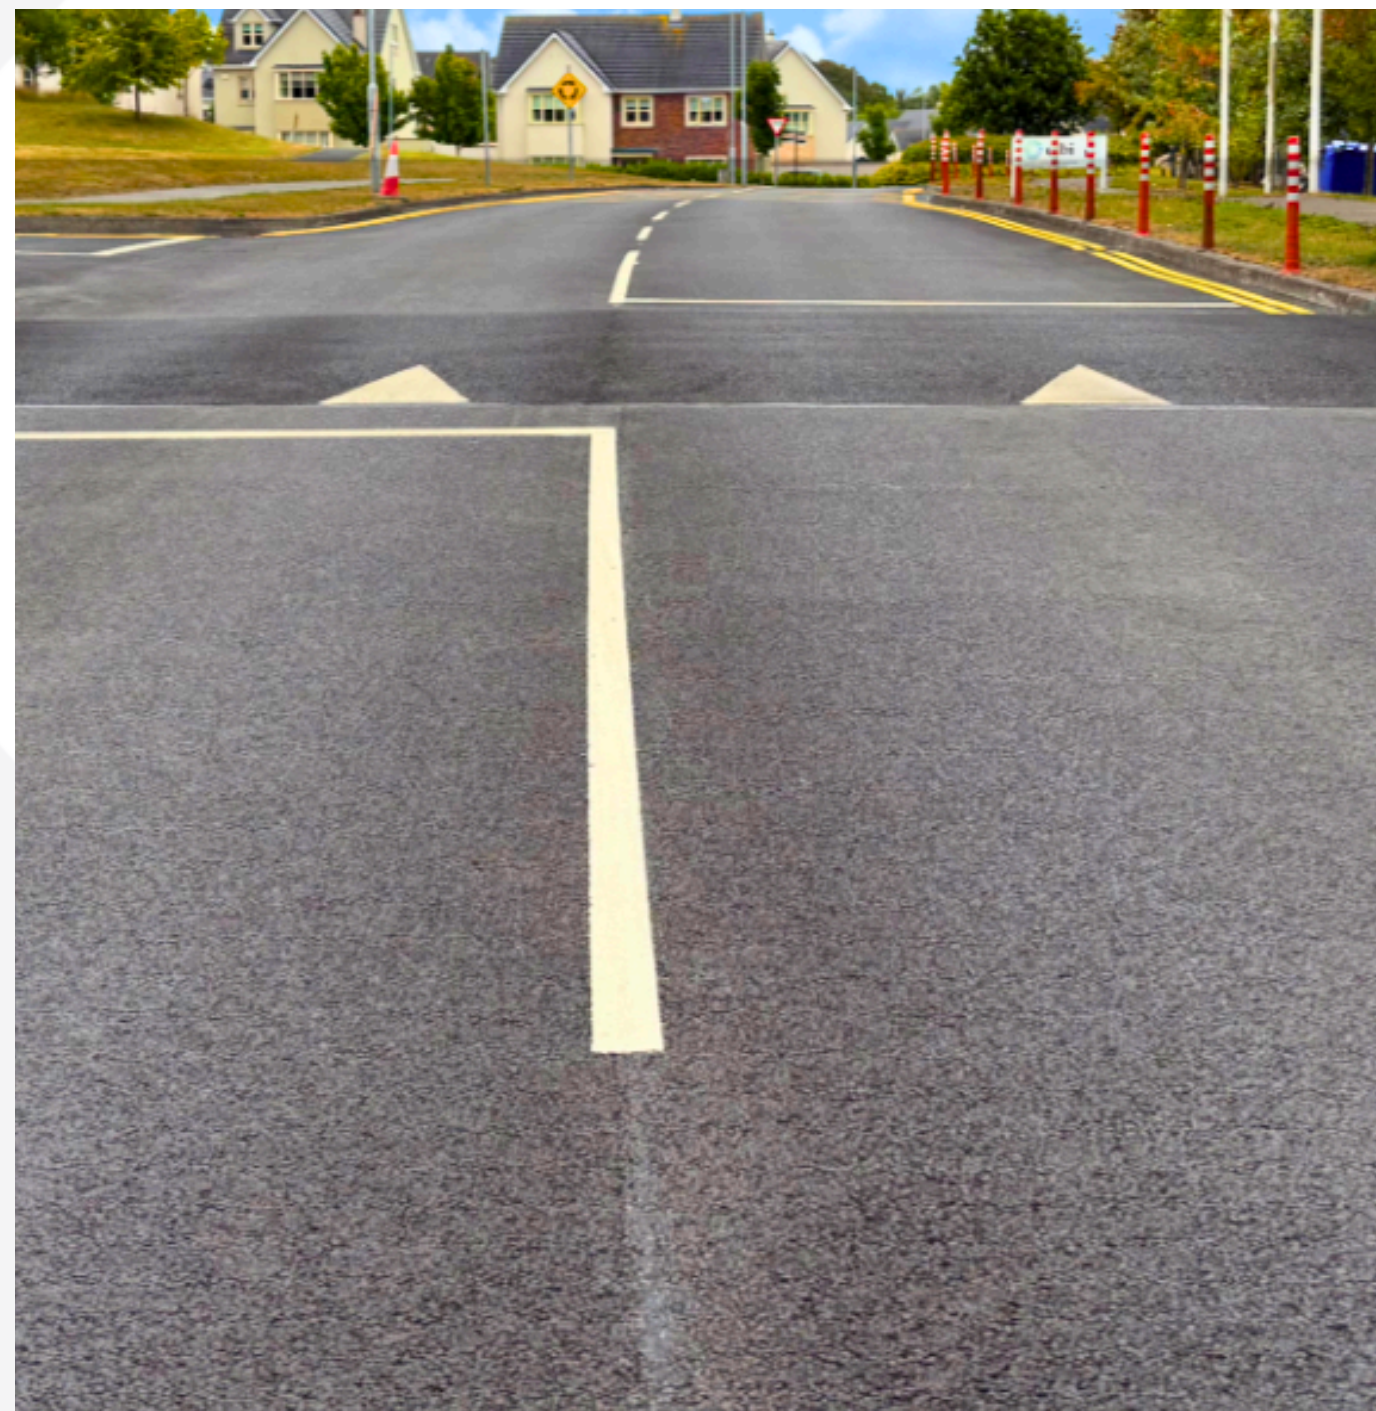

Year of Completion: 2026

Region: Leinster

This project involved the planing and resurfacing of a busy public road, requiring careful coordination to minimise disruption while maintaining safe access for all road users.

All activities were carried out within a live traffic environment, demanding strict adherence to safety standards, effective programme management and close collaboration with relevant stakeholders to ensure the successful delivery of the project.
