

Case Study

Boyne Valley To Lakelands Greenway

Client : Meath County Council

Year of Completion: 2026

Region: Leinster

Kilsaran delivered 7km of surface renewal on the Boyne Valley to Lakelands Greenway, a 30km walking and cycling route running from Navan, Co. Meath to Kingscourt, Co. Cavan. The works incorporated AC20 Binder Course and SMA 10 Surf 70/100 Surface Course, both sustainably produced using reclaimed asphalt pavement (RAP) and our Thermaphalt warm mix system, helping to reduce carbon emissions while maintaining high performance standards.

Kilsaran provided a smooth, durable finish suitable for both walkers and cyclists on this busy route. The completed works have enhanced the quality and longevity of the Greenway surface, supporting safe, sustainable outdoor recreation.
